

LEOPARD SERIES

MODEL

620

and Model 621

IMPORTANT DRIVE INFORMATION

Pump speed and pump output in gallons per minute as tabulated is based upon a 1725 RPM drive motor. Select motor pulley size to provide GPM of the approximate pump output desired.

Pump RPM and GPM output are approximate values due to variations in pulleys, belts and motors between manufacturers and a ±5% pump output tolerance.

Horsepower figures shown are for electric motor only. For gas engine requirements, follow engine manufacturer's recommendations. In general, use a gas engine with approximately double the electric motor horsepower.

TABLE I
HORSEPOWER CHART
MODEL 620

Servicing discharge valves and valve seats

Remove the discharge manifold as described and pictured on page 6. Remove the discharge valve seats and invert the manifold. The discharge valve seat will have to be pried out.

Inspect the discharge valves for wear or ridges. If damaged, replace them. Check valve seats. If nicked or rough, lap on a fine oilstone until smooth. Check seal by placing the discharge valve tightly over face of the valve seat and blow through the valve. No air will pass through if properly seated.

Reassemble valves and valve seats in the manifold — spring retainer first, then the spring and then the valve. The flat side of the discharge valve faces out.

The recessed side of the discharge valve fits over the spring. Insert the discharge valve seats.

Insert one end of cylinders into the discharge manifold, being careful not to damage cylinder O-rings. Position assembly back on the pump, again being careful not to damage cylinder O-rings when inserting cylinders into the inlet manifold. Replace lockwashers and nuts, torque to 125 inch-pounds.

CAUTION: When restarting the pump, *check carefully to see that there is no cylinder motion* as it will cause premature failure of the O-ring cylinder seals. Cylinder motion, if any, must be eliminated by procedure as detailed on page 6.

PARTS LIST

CAT PUMP, MODEL 620 AND MODEL 621

ACCESSORIES

ACCESSORIES

68	06001	Prrrrr-O-Lator II	1
69	06101	Cat Pumps Crankcase Oil (Bottle)**	2
69	06100	Cat Pumps Crankcase Oil (Case)	12
