- Once unit has been installed use 5871B8 cap plugs supplied with unit to seal holes in canister bottom located in lower cleanout door. Then connect to power, insert shampoo and spot formula into bottom door and attach lids to appropriate bottles.
- Turn unit on and move to program instructions

Programming Instructions:

Coin acceptor:

- No programming to acceptor needed if unit was purchased with the standard Imomex Z32 electronic acceptor (8149-92 our part number) is pre-programmed to accept US quarters, .984 tokens, US $1 coin and 1.073 token. Acceptor is pre-programmed before it is sent to J.E. Adams.
- If different acceptor was purchased, see additional literature sent along with unit for programming info.

Bill acceptor:

- Bill acceptor comes pre programmed from J.E. Adams and should not require any changes. If additional programming is needed to acceptors please refer to additional literature sent along with this unit.

Display:

- Unit may be programmed when received depending on information given at that the time of order.
- To program follow the instructions below.

Display programming with remote:

1) Press the red power button.
2) Timer will display 0000. At this time type in 4 digit access code. Note code will be 1234 until changed by customer.
3) Once code has been entered display should read ok. If display does not read ok, repeat step 1 and 2.
4) Press ***CH +*** button. Timer will display coin value. This should $.25 and should not be changed.
5) Press the ***CH +***button. Display will now read (***A: 30***) or may be a different time. (***A***) Will be the time per coin for the ***VAC***. Set desired time per coin by using the ***VOL –*** to decrease or the ***VOL +*** to increase. Once time is entered move to next step.
6) Press the ***CH +*** button. Display will now read (***B: 30***) or may be different time. (***B***) Will be the time per coin for ***TURBO***. Set desired time per coin by using the ***VOL –*** to decrease or the ***VOL +*** to increase. Once time is entered move to next step.
7) Press the ***CH +*** button. Display will now read (***C: 30***) or may be different time. (***C***) Will be the time per coin for ***SHAMPOO***. Set desired time per coin by using the ***VOL –*** to decrease or the ***VOL +*** to increase. Once time is entered move to next step.
8) Press the ***CH +*** button. Display will now read ***D***. ***D*** is not used.
9) Press the ***CH +*** button. Display will now read ***E***. ***E*** is not used.
10) Press the ***CH +*** button. Display will now read ***F***. ***F*** is not used.
11) Press the ***CH +*** button. Display will now read (on A). This is the number of coins to start ***VAC.*** Use the ***VOL –*** and ***VOL +*** to adjust. Once this is done press the ***CH +*** button and repeat for (B) ***TURBO*** and (C) ***SHAMPOO***.
12) Press the **CH +** button. Display will read bonus time. Set if desired. See explanation at the end programming instructions.
13) Press the ***CH +*** button. Display will debit mode. Set if desired. See explanation at the end programming instructions.
14) Press the ***CH +*** button. Display will delayed start. Set if desired. See explanation at the end programming instructions.
15) Press the ***CH +*** button. Display will read ***HLxx***. Set if desired. See explanation at the end programming instructions.
16) Press the ***CH +*** button. Display will read Restart off or restart on depending on what is set. Restart off will require a person to put in full amount after unit is

turned off to reactivate. Restart on allows for additional coins to be put in the machine to keep unit running. To set use ***VOL –*** or ***VOL +*** to change.

17) Press the ***CH +*** button. Display will now read ***STD*** or ***USER*** or ***MIX***. To make a custom message use ***VOL +*** button to scroll to USER. At this point press and hold ***CH +*** button until original message appears. At this time you may change the message simply by using the ***VOL –*** or ***VOL +*** buttons to change letters. ***Once message has been entered you must put the symbol / at the end of message.*** This will tell display that this is the end of the message.
18) Press the ***CH +*** button now 5 more times to exit programming.
19) Unit should now be programmed.

Program definitions:

- Bonus time settings:
  - Amount of time set in bonus time is added to regular time per coin/pulse(e.g. if you want to give 45 seconds for bonus time and your regular time per coin is 30 seconds, you would set bonus time at 00:15)
  - Bonus is disabled by setting bonus time to 00:00.
  - If bonus time is set to less than one minute, bonus time is added when bonus coin is reached and every coin after that until time expires.
  - If bonus time is set at 1:00 or more, bonus will be a “one time” bonus. Bonus time will only be added for bonus coin or multiplies of bonus coin (e.g. 16^{th} coin, 32^{nd} coin, etc). Any other coin will on receive regular time per coin.
  - If bonus time is set to 99:00, when bonus coin is deposited, timer will show “-on-“ and timer will continue to run until coin switch wire is shorted to ground by a loop detector or other switch closure for a minimum of two seconds.

- Debit and credit mode:
  - Debit mode: As coins are deposited display shows “$1.75 MORE, $1.50 MORE, $1.25 MORE” etc. until start price is reaches. Once start price is reached display switches to time accumulating until no more coins have been deposited.
  - Credit mode: As coins are deposited display shows money accumulating ($.25, $.50, $.75 etc). If timer is also set to delayed start mode timer will continue to show money accumulating until no more coins have been deposited. If timer is set to instant start, as soon as start price is reached, timer will change to time counting down.
  - Both mode: As coins are deposited display shows money accumulating ($.25, $.50, $.75 etc). If start price is not reached, after 5 seconds timer will alternate between “add $x.xx more” and amount of money already deposited.

Display programming with push button:

- Unit can be programmed using buttons that are located inside display. One is labeled ***S2***, which is used to change from item to item. One is labeled ***S1*** which is used to set desired value. If you hold down ***S1*** this will cause numbers to decrease. If you repeatedly push ***S1*** numbers will increase.
- When programming with buttons use same instructions as remote except for the following. Where it says to press ***CH +*** use ***S2*** and where it says to use ***VOL +*** or ***–*** use ***S1***.

Operating Instructions:

- Select desired function.
- Insert coins or bills to start desired function.
- If shampoo/spot is selected, it is recommended that you vacuum before applying formula.
- If other function is selected other than original selected item unit will recalculate timer based on the amount of money it takes to start the specific function.
- Once service is used, hang up hose.

Operating Instructions 29000UNI-29003UNI:

- Select desired function.
- Insert coins or bills or swipe credit card to start desired function. When credit card is selected swipe card and wait for activation.
- If shampoo/spot is selected, it is recommended that you vacuum before applying formula.
- If other function is selected other than original selected item unit will recalculate timer based on the amount of money it takes to start the specific function.
- Once service is used, hang up hose.

Changing fluids:

- Disconnect power. Unscrew cap from empty bottle. Remove empty bottle. Insert new bottle into unit. Insert line into bottle and screw cap onto bottle. Reconnect power

Maintenance:

- Filter bags should be taken out weekly and shaken out. Also it might be a good idea to keep a new set of bags on hand so that once a month or longer you can take original bags out and wash them.
- Check vac hose for cracks on a weekly basis.
- Check shampoo and spot formula bottles to assure that they are full.
- Clean canister with a stainless steel cleaner as needed.
- Check motor brushes approx. every 3 months for excessive wear. Motor brushes should be changed if they are shorter than ¼". ***Please disconnect power before doing this.***
- Check all shampoo lines and assembly for any signs of wear.
- All servicing of machine should be conducted by an authorized service representative.

Troubleshooting: *DISCONNECT POWER BEFORE SERVICING*

Problem	Possible cause	Solution
Unit is not powered	Breaker inside unit is not in the on position	Flip breaker on
Display is not powering	Breaker inside unit is not in the on position	Flip breaker on
	Check transformer inside main power box in unit. Is there 24VAC at output terminal?	Replace transformer (8131-2)
Display reads "fail"	Coin acceptor putting out continuous pulse	Press mode button on display. If fail does not go away replace coin acceptor. (8149-92)
	Program in display may be lost	Reprogram display. If fail goes away and then comes back, replace battery in display.
Unit keeps blowing my breaker from my incoming power source	Inadequate wire size supplied to machine	Call electrician and install proper wire size for 30amp service versus length or run.
	Wrong size breaker	Install correct breaker(only use wire size that is adequate to handle 30 amp breaker)
Fuses for vac motors keep blowing.	Inadequate wire size supplied to machine	Call electrician and install proper wire size for 30amp service versus length or run.
	Motor brushes may be bad or too short	Replace motor brushes (8055BR)
Unit has lost suction	Vac hose clogged	Clean out debris from vac hose
	Filter bags need cleaned	Clean out filter bags or replace (8076)
	Vac hose is damaged	Replace vac hose (2036)
	Cleanout door gaskets torn or worn	Replace gaskets (8159)
Unit has shut down For no apparent reason	This unit has a reset thermal limiter in the compressor. Unit may have shut down due to excessive heat	Turn off power to the machine and wait for a period of 5 minutes. Reapply power and activate machine.
